Charley Goodman has been wearing a deep, dark red smile which has permeated his whole being within the past few days, and nothing short of gold nuggets has been too good for his friends. Budweiser banquets, frog friecassees, champagne flutes, oyster jellies, bourbon hunkfuzzles or gin cocktails have all looked alike to Charley when the immediate appetites of intimate friends were an item. The reason for all this exuberance was enough to make him rash. It was the arrival, last Friday morning, of a fine ten-pound boy baby at his home.

One of the very best remedies that can be applied to a wound made by a rusty nail, and which is almost infallible in its cure, is to take a quantity of peach-leaves, beat them to a pulp, and then apply them to the wound, and in a very short time an improvement will be noted in the wound. Several persons have tried this remedy when all others failed to give relief, and it was beneficial in its results. At this season of the year, when so many persons are injured by tramping on a rusty nail, this remedy should be noted.—Scientific American.

John Brokmeyer, who was the promoter of the excursion to Bunceton on Thursday of last week, made a decided success of the event. Mr. Brokmeyer worked up the excursion and deserves the entire credit for its success, and the Missouri Pacific was fortunate in securing him to do the hustling and local advertising on the occasion. The big crowd showed the effects of his handy work.
